Are you tired of getting 30 seconds of frustration for each quarter you feed to a video game? Are your dreams haunted by visions of uncooperative joysticks? Do you suffer from an unfulfilled desire to see your name on the high score roster at the local arcade?

Well, Uncle Bezo wants you!

Suck in that gut, tuck in your chin, and march over to the recruiting station to enlist in the Arcade Army! A few weeks in the Arcade Boot Camp will make a real game player out of you! Learn to run, jump, and shoot; become an ace chopper pilot; master the skills of the road; and learn to put it all together like a real arcade hero!

Beat all that you can see.

Arcade Boot Camp™

Apple version

By John Besnard

So you decided to enlist in the Arcade Army, eh? Well, around here there's only one way to do things--the Army way! So stand up straight, wipe that silly smile off your face and listen up, soldier!

To Begin

Put the disk in the drive and turn the computer on. Watch the educational training film that appears on the screen. After you have memorized it, you can bypass it by pressing the RETURN key.

Signing up

Enter your serial number. (This is a number between 1 and 5, inclusive). The computer will ask you your name. Type it in. From now on, every time you boot this disk it will display your name, rank, and serial number. Never tell a foreign (or domestic) spy any more than that, it might lead to your demise. It's also against regulations and in this Army we do things the Army way!

To proceed to the training area, press the ESC key. Once there, you will be greeted by the Drill Instructor. The DI's primary occupation is the motivation of recruits. He will motivate you to pick one of five training areas. Should his methods fail to persuade you to make a decision, you'll be booted out of the Arcade Army and you'll have to re-enlist if you ever want to amount to anything.

Watch out for land mines. They could turn up at anytime, just to keep you recruits on your toes. But there's not enough powder in them to waste you, only to teach you to watch where you're going. Get smart and maybe we'll remove the mines later.

Ordnance Regulations

The military hardware used in your training has some built-in features worth taking advantage of.

The "P" key will pause the simulation.

"CTRL-S" will toggle the sound effects.

"Space bar" or holding down both joystick buttons at the same time will allow you to bypass the music that follows failure during any task. Please note that often the reason for your failure will be pointed out on the screen with a small arrow. Study it carefully.

Rank

The purpose of your training is to work your way up to the rank of Sergeant Major. Right now you're a lowly civilian and unless you shape up you're going to stay one! Should you show some aptitude, you may earn your stripes as follows:

Recruit	No Stripes
Private	One Stripe
Private 1st Class	Two Stripes
Corporal	Three Stripes
Sergeant	Four Stripes
Staff Sergeant	Five Stripes
Sergeant 1st Class	Six Stripes
Master Sergeant	Seven Stripes
Sergeant Major	Seven Stripes & 1 Star

In event of malfunction

Should a message appear during the loading of one of the training simulations, you will be given an error code that refers to the following table:

Error Code	Possible Cause	Remedy
4	Disk drive door is open	Close door
4	Disk has been removed	Put it back in
4	Disk is defective	Return it for replacement
4	Cat ate the disk	Sell the cat
4	Another disk is in drive	Reboot system

Disk Replacement

If your Arcade Boot Camp disk should fail within 60 days of purchase, return it to Penguin Software for a free replacement. After 60 days, please return it with \$5 and we'll rush a new one to you right away. We feel this is a fair replacement policy for entertainment software and is in line with our policy of not copy-protecting our utility and applications software. Please help us by not copying our entertainment software and not making any copies of our utility and applications software except for your own use as backups.
