Home Data Manager™

by Mark Pelczarski

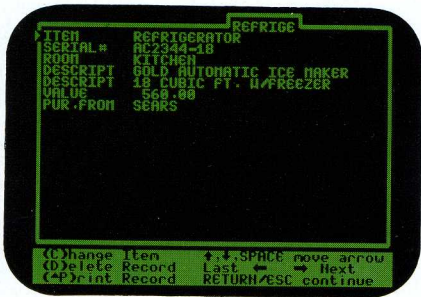

Polarware brings you an information manager that is:

- Easy-to-use
- Powerful
- Dependable
- Economical

Home Data Manager is a complete filing and sorting program for home and small business.

Use it to systemize tax information, categorize collections, catalogue home inventory, compile mailing lists, and much more. It is a versatile filing program that lets you organize, file, search, sort, and print your data. You create your own file format with over 1000 "folders" of information fitting on a disk. And when you need to, you can even redefine your data format, or split and combine data disks.

- Search for items or groups of items with multiple search criteria.
- Easy and versatile printing in any format you want, from labels to invoices. You can design your own printouts.
- Numeric formatting and totalling.
- Change file formats, and split and combine data disks.

ABOUT THE AUTHOR

Mark Pelczarski — While teaching computer science in the late 70's, Mark discovered the Apple II and its graphics capabilities. As a result, he produced *The Complete Graphics System* and *The Graphics Magician*. Mark is President of Penguin Software, and is in charge of its Software Development Group. When not at work programming, he can be found playing guitar, mandolin, banjo, and/or steel drums.
